

# Select 8 – upgrading to 8.10

Last update:

April 2022

This Software is provided by Emerson Commercial & Residential Solutions Europe to assist in the selection of compressors and condensing units. Emerson Commercial & Residential Solutions cannot be held liable for issues arising from the application using information provided by this software.

### 1. Introduction

This document will guide you step by step through the process of upgrading Select to version 8.10.

# 2. Why is a manual action required?

The latest version of Select comes with a new type of installer context, moving out from peruser to per-machine installation, this approached is considered a best practice and will give more flexibility to your IT department. Unfortunately upgrading a version from one context to another is not supported by the auto-update feature.

### 3. Preparations

The operations below will require an account with administrator privileges, starting with Select version 8.7.2 it will be mandatory to uninstall Select too.

Download the latest version of Select : Select 8.10.3

If needed, a link to download the previous version is also available <u>here</u>, but normally you should be able to uninstall it through the app menu of Windows.

Please follow the steps below, first point 4 and then 5.

### 4. Uninstalling older versions

To uninstall the previous version, Click on Windows "Start" button then "Settings"

Select "Apps"

				Windows Settings			
			Ε	Find a setting		P	
⊒	System Display, sound, notifications, power		Devices Bluetooth, printers, mouse		Phone Link your Android, iPhone		
	Apps Uninstall, defaults, optional features	8	Accounts Your accounts, email, sync, work, other people	。 A字	Time & Language Speech, region, date	8	
Q	Search Find my files, permissions	۵	Privacy Location, camera, microphone	C	Update & Security Windows Update, recovery, backup		

and under "App & features" search for keyword "Select" then click on "Uninstall". You will be prompted to enter an account with admin privileges (or to accept the changes if you are admin).

If this is not working or you have an older version you cannot uninstall, please contact <u>select.feedback@emerson.com</u>.

# 5. Installing 8.10

Once any remaining older versions are uninstalled, we can move to the installation of the new version you have download in point 3.

Double click on the msi file, then click "Next"

#### Accept the license by ticking the box

Choose your installation path or leave the default

Click the "Install" button to start the installation process of Select
